WASTE MANAGEMENT

Waste management is the key to solving our planet's pollution problem.

The most important question to be answered is;

Where do I dispose a product without harming our planet?

Here is our waste disposal guide:

WHERE TO DISPOSE					
	LANDFILL (BIODEGRADABLE)	HOME COMPOST	INDUSTRIAL COMPOST	RECYCLE BIN	HOT WATER
BAGASSE	✓	✓	✓	✓	✗
CORNSTARCH	✓	✗	✗	✓	✗
WHEAT STRAW	✓	✗	✗	✓	✗
PAPER	✓	✓	✓	✓	✗
PLA	✗	✗	✓	✗	✗
BIRCHWOOD	✓	✓	✓	✓	✗
BAMBOO	✓	✓	✓	✓	✗
GLASS	✗	✗	✗	✓	✗
RPET	✗	✗	✗	✓	✗
PVOH	✓	✓	✓	✓	✓
ALUMINUM	✗	✗	✗	✓	✗

MORE ABOUT EACH PROCESS

For more information visit our website www.ncdcorporation.com

	PROCESS	DURATION	WHAT IT BECOMES
 LANDFILL (TRASH) 	The product will disintegrate because it is made with natural fiber and plastic free, it is landfill biodegradable.	1 to 24 months	Gas & Leachate
 HOME COMPOST 	The product will decompose in a home composting environment at lower temperature than an industrial facility, it is made with natural fiber and plastic free.	30 to 180 days	Organic fertilizer
 INDUSTRIAL COMPOST 	The product will not decompose in a home composting environment, it needs the higher temperature found at industrial facility, it is made with natural fiber and plastic free.	30 to 180 days	Organic fertilizer
 RECYCLE BIN 	The product doesn't decompose in nature nor in industrial facility, it contains plastic, glass or aluminum and the best way to dispose of it, is to recycle it.	Recycle process	Paper, Plastic, Aluminum, etc.
 HOT WATER 	The product dissolves instantly in hot water between 60°C and 90°C.	Dissolves Instantly	Water & Carbon Dioxide

Always consult and follow your municipality waste management guidelines as it may differ depending on your location due to local laws and facilities.

OUR CORNSTARCH PRODUCTS ARE:

- ✓  Suitable for Hot & Cold food and drinks
- ✓  Plant made, Cornstarch
- ✓  Biodegradable
- ✓  From sustainable & renewable resource
- ✓  Chemical and Toxic Free
- ✓  Natural & Carbon Neutral

CORNSTARCH

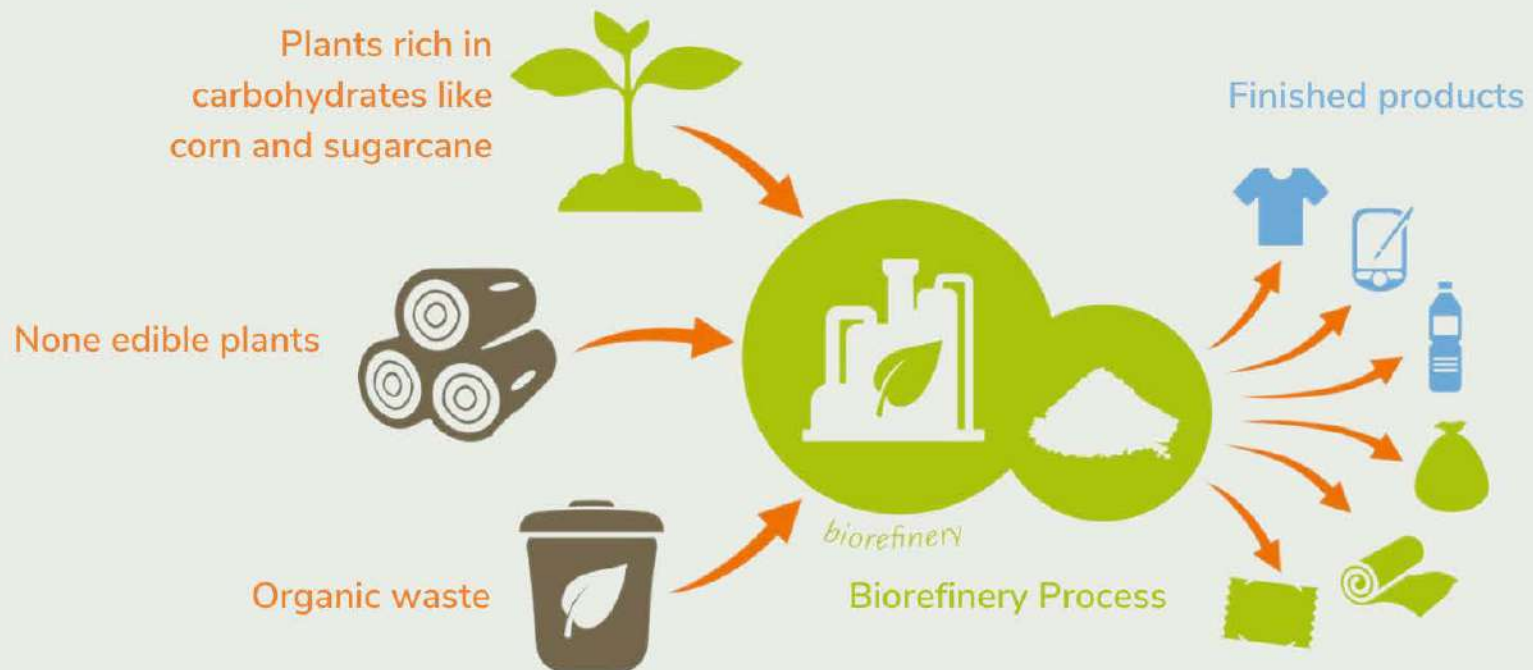

↳ Biodegradable

↳ 6 to 18 Months to degrade

↳ The residue becomes food or nutrient for animals or the soil.

Bioplastics are made from a wide range of bio-based renewable raw materials
