WASTE MANAGEMENT

Waste management is the key to solving our planet's pollution problem.

The most important question to be answered is;

Where do I dispose a product without harming our planet?

Here is our waste disposal guide:

					
WHERE TO DISPOSE	LANDFILL (TRASH)	HOME COMPOST	INDUSTRIAL COMPOST	RECYCLE BIN	HOT WATER
BAGASSE	✓	✓	✓	✓	✗
CORNSTARCH	✓	✓	✓	✓	✗
WHEAT STRAW	✓	✓	✓	✓	✗
PAPER	✓	✓	✓	✓	✗
PLA	✗	✗	✓	✗	✗
BIRCHWOOD	✓	✓	✓	✓	✗
BAMBOO	✓	✓	✓	✓	✗
GLASS	✗	✗	✗	✓	✗
RPET	✗	✗	✗	✓	✗
PVOH	✓	✓	✓	✓	✓
ALUMINUM	✗	✗	✗	✓	✗

MORE ABOUT EACH PROCESS

For more information visit our website www.ncdcorporation.com

	PROCESS	DURATION	WHAT IT BECOMES
 LANDFILL (TRASH) 	The product will disintegrate because it is 100% natural and plastic free, it is landfill biodegradable.	30 to 180 days →	Gas & Leachate
 HOME COMPOST 	The product will decompose in a home composting environment at lower temperature than an industrial facility, it is 100% natural and plastic free.	30 to 180 days →	Organic fertilizer
 INDUSTRIAL COMPOST 	The product will not decompose in a home composting environment, it needs the higher temperature found at industrial facility, it is 100% natural and plastic free.	30 to 180 days →	Organic fertilizer
 RECYCLE BIN 	The product doesn't decompose in nature nor in industrial facility, it contains plastic or glass and the best way to dispose of is to recycle it.	Recycle process →	Paper, Plastic, Clothes, etc.
 HOT WATER 	The product dissolves instantly in hot water between 60°C and 90°C depending on the product.	Dissolves Instantly →	Water & Carbon Dioxide

Always consult and follow your municipality waste management guidelines as it may differ depending on your location due to local laws and facilities.

OUR RECYCLED PAPER PULP PRODUCTS ARE:

-  **Water proof & Shock proof**
-  **100% Compostable**
-  **From sustainable & renewable resource**
-  **Chemical and Toxic Free**
-  **100% Natural**
-  **Environmental Friendly Non Petroleum Based Recycled Carton Paper**
-  **FSC Certified made of recycled paper**
